

Raphael Roy-Jauvin

Montréal, QC | 250-857-8771 | rroyjauvin@gmail.com | Portfolio: raphroyjauvin.ca

PROFESSIONAL SUMMARY

Urban planning graduate student and geospatial data specialist. Currently completing McGill's Master of Urban Planning while working at NOAH Intelligence, where I build the automated data pipelines behind property-level flood risk modeling for municipal clients. Geospatial experience across climate risk, transportation, telecommunications, and ecological mapping. Trilingual: English, French, German (C1).

EDUCATION

Master of Urban Planning | McGill University | Montréal, QC | *In progress – expected graduation April 2028*

Advanced Certificate in GIS | British Columbia Institute of Technology | Online | *Sep 2025 – Jul 2026*

BSc, Natural Resource Conservation | University of British Columbia | Dean's Honor Roll | *2008 – 2012*

TECHNICAL AND PROFESSIONAL SKILLS

- **Languages:** Fluently bilingual (English, French) with C1-level German.
- **Planning and Spatial Analysis:** Network analysis, catchment and accessibility analysis, suitability and weighted-overlay modeling, census and land use data integration.
- **Geospatial Engineering:** Python automation (PyQGIS, ArcPy), QA/QC pipeline design, spatial data standards and CRS management, SQL, FME (Form certified).
- **Platforms:** QGIS, ArcGIS Pro, ArcGIS Online and Enterprise (StoryMaps, Dashboards, Experience Builder), remote sensing with ArcGIS and ENVI.

PROFESSIONAL EXPERIENCE

Senior GIS Technician | NOAH Intelligence Inc. | Remote | *Feb 2026 – Present*

- Sole GIS specialist at a climate-tech startup; own the municipal spatial data layer behind property-level flood risk models, from raw open data through automated pipelines to hydraulic-model-ready (InfoWorks ICM) and web-portal products.
- Designed and built automated PyQGIS batch pipelines converting citywide infrastructure data into standardized, automatically audited products across multiple municipalities, with automated data-currency monitoring.
- Built a reusable QGIS Processing toolbox encoding the team's hydraulic engineering rules; its gap-filling tool resolved 98%+ of missing attribute values across infrastructure networks, eliminating weeks of manual derivation.
- Established company-wide spatial data standards (CRS conventions, QA rules); designed the flood-map symbology and a generalization workflow that reduces multi-million-vertex flood layers to web-deliverable sizes.

Telecommunications GIS Planner | MRK Media AG | Munich, Germany | *Sep 2016 – Sep 2017*

- Implemented fiber optic infrastructure plans across Germany using GIS-based planning tools; performed QA/QC and maintained maps, symbology, and documentation for engineering teams and planning approvals.

Ecological Landscape Classification GIS Technician | Yukon Government | Whitehorse, YT | *Jun 2012 – Jun 2013*

- Performed spatial analysis on natural resource datasets, generating classification layers and site-ranking outputs for ecological land use planning; created consultation-ready maps and collected field, GPS, and ecological data.

Remote Sensing GIS Assistant | University of British Columbia | Vancouver, BC | *Sep 2008 – May 2012*

- Co-authored a peer-reviewed study on climate-induced tree species range shifts; designed habitat extent maps using ArcGIS and ENVI.

SELECTED PROJECTS · raphroyjauvin.ca/#work

- **Ottawa-Montreal ALTO High-Speed Rail Corridor Analysis:** Population catchments, demographics, and land use along Canada's first announced high-speed rail segment (ArcGIS StoryMaps).
- **Victoria Light Rail Transit Feasibility:** Weighted overlay analysis identifying optimal transit corridors, delivered as a publication-ready map.
- **Greater Vancouver Emergency Response Times:** Network analysis with Dashboard and StoryMap evaluating ambulance coverage under multiple traffic scenarios.
- **Rail Connectivity in Germany:** OpenStreetMap rail data extracted with Python, visualized in Matplotlib.

OTHER PROFESSIONAL EXPERIENCE

BC Emergency Health Services | Victoria, BC | *Sep 2017 – 2026*

Dispatch Supervisor (2024–2026) | Paramedic and Dispatcher (2017–2024)

- Led a 12-person emergency dispatch team, coordinating complex multi-agency responses using GIS-enabled dispatch software and real-time situational analysis.
- Managed medical emergencies as a paramedic and provided assessment, treatment, and transport.

CERTIFICATIONS AND ACHIEVEMENTS

- C1 German Certification (Goethe-Institut, 2025)
- Primary Care Paramedic License (Justice Institute of BC, 2016)
- Yukon Commissioner's Award for Bravery (2013)
